

The SIMLock™ Fact Sheet

PRODUCT	The SIMLock™ is a home safety device that can be easily installed on any regular deadbolt. When the SIMLock™ is engaged, the deadbolt cannot be picked by a locksmith, house key, unauthorized key duplicate or key bump.
STATISTICS	<p>14 percent of break-ins in the U.S. occur when the resident is home.</p> <p>In two-thirds of completed burglaries, the burglar entered through unlocked or improperly locked doors or windows (Home Safety Council).</p> <p>Hundreds of videos, chatrooms and Internet sites are available to learn to pick a lock or create a <u>bump key</u>. [will link to article about new technology]</p>
MISSION	<p>The SIMLock™ was developed as a means to provide peace of mind and a greater level of personal security for people—especially women, older adults or individuals who spend a lot of time at home.</p> <p>The company is committed to being a good corporate citizen through the manufacturing, packaging and sales process. A portion of the profits of the SIMLock™ benefit Womenspace, a Eugene, Ore.-based nonprofit that works to end domestic violence in Lane County.</p>
INVENTOR	Albert Nokelberg
COST	The SIMLock™ retails for \$9.98, or two for \$15.98
MANUFACTURING INFORMATION	<p>The SIMLock™ is 100 percent locally made in Oregon.</p> <ul style="list-style-type: none">▪ Henry Manufacturing, Inc. (Eugene, Ore.) – Metal mold production▪ Boone’s Machine and Manufacturing (Portland, Ore.) – Plating and spacer production▪ Pearl Buck Center Production Services (Eugene, Ore.) – Packaging
